WHY SMART ENERGY COMMERCIAL

Commercial energy solutions. Backed by experience. Built for the future.

Smart Energy has been helping Australians reduce energy costs for more than a decade. Founded in Byron Bay in 2016, we've grown to 18 locations nationally, delivering 800+ projects every month. Our commercial division brings that national capability together with experienced engineers and energy specialists delivering solar PV, battery storage and EV charging for Australian businesses.

Solar installed	**155 MW**
Battery storage	**143 MWh**
Employees	**350+**

SAA-accredited engineers & technicians
NETCC Approved Seller
No. 1 Battery Installer – 2025 (SunWiz)

BACKED BY RINNAI

The strength of Rinnai. A decade of energy expertise.

Smart Energy is wholly owned by Rinnai Australia, combining the strength of one of Australia's most recognised energy brands with a decade of renewable energy experience. Rinnai brings more than 55 years of Australian operations and a reputation for reliable, high-performance HVAC and hot water solutions across commercial and industrial environments.

Through Smart Energy Commercial, businesses can access the same focus on quality, reliability and long-term performance across:

- **Solar PV**
- **Battery Energy Storage**
- **EV Charging**
- **Integrated Energy Solutions**

WHY NOW

A significant opportunity for Australian businesses

Changes to the Federal Government's Small-scale Renewable Energy Scheme (SRES) are creating a significant opportunity for eligible commercial solar projects between 100kW and 1MW.

From 1 October 2026, eligible systems up to 1MW can receive the certificate benefit upfront, allowing the incentive to be incorporated into the project economics at the point of sale.

A 500kW commercial solar system could receive an estimated $136,000 benefit through the scheme, subject to eligibility and applicable certificate values.

That can make now an important time for businesses to assess their energy requirements, building characteristics and future energy strategy.

100 kW–1 MW

Eligible system size, from 1 Oct 2026

~$136,000

Estimated benefit, 500 kW example*

UNDERSTAND WHAT YOUR BUSINESS COULD SAVE

Every business is different.

Smart Energy Commercial can assess your energy consumption, operating profile, building requirements and future energy needs to develop a solution designed around your business. From initial assessment and system design through to installation and ongoing support, our team can provide an end-to-end commercial energy solution backed by Smart Energy and Rinnai Australia.

> Reduce energy costs. Improve efficiency.
> Invest in your future.
